

Squares of a Sorted Array:-

Code:-

```
class Solution {
    public int[] sortedSquares(int[] nums) {
        int n = nums.length;
        int[] ans=new int[n];
        int left=0, right = n-1;
        for(int i=n-1;i>=0;i--){
            if(Math.abs(nums[left])>Math.abs(nums[right])) {
                ans[i] = nums[left] * nums[left];
                left++;
            } else{
                ans[i] = nums[right]*nums[right];
                right--;
            }
        }
        return ans;
    }
}
```

Output:-

The screenshot shows the LeetCode interface for the problem 'Squares of a Sorted Array'. The left sidebar displays the problem status as 'Accepted' with 137/137 testcases passed, submitted by 'tameem_shaik' on Sep 15, 2026. A banner for 'Unlock the Full LeetCode Experience' is visible. The main area shows the Java code for the solution, which is the same as the code provided in the previous block. The bottom right section shows the 'Test Result' for 'Case 1' and 'Case 2', both marked as 'Accepted' with a runtime of 0 ms. The input for Case 1 is 'nums = [-4,-1,0,3,10]'.

Runtime: 1 ms | Beats 100.00%
Memory: 47.15 MB | Beats 75.52%

Accepted Runtime: 0 ms
Case 1 Case 2
Input: nums = [-4,-1,0,3,10]
Output:

Find Pivot Index:-

Code:-

```
class Solution {  
    public int pivotIndex(int[] nums) {  
        int total = 0;  
        for (int num : nums) {  
            total += num;  
        }  
        int leftSum = 0;  
        for (int i = 0; i < nums.length; i++) {  
            int rightSum = total - leftSum - nums[i];  
            if (leftSum == rightSum) {  
                return i;  
            }  
            leftSum += nums[i];  
        }  
        return -1;  
    }  
}
```

Output:-

The screenshot displays the LeetCode interface for the 'Find Pivot Index' problem. The code is in Java and has been accepted. The runtime is 1 ms, and the memory is 47.00 MB. The test result shows the input [1, 7, 3, 6, 5, 6] and the output 3.
